How Amateur Radio played a role in the Hawaii emergency response

While an official retraction from emergency officials of the alert did not come until 38 minutes had elapsed, amateur radio operators were able to confirm within 13 minutes that the Hawaii EAS alert was false.

FCC Enforcement: A call to action

In recent months on 40M and 80M, there has been a concern by many Amateur Radio operators regarding certain individual's operating behavior, specifically on 7.200 MHz and 3.822 MHz.

AmateurRadio.com

ARRL again calls for action on symbol rate limits

Introduced in 1980 the symbol rate restriction has crippled the development of innovative data modes in the United States and amateurs have been trying to get it scrapped for decades.

Low-power local radio rises

A knowledge of geography is essential if you are running a tiny, 100-watt radio station. For a low-power FM radio station, anything measurable in miles is good.
